# INFINITY V1 PERFORMANCE LIGHTWIND

:: PERFORMANCE LIGHTWIND :: CLASSIC TWIN-TIP FEELING :: IMPRESSIVE UPWIND DRIVE :: ALL RIDER LEVELS

## RANGE OF USE

## SUGGESTED SIZE & RIDER WEIGHT RANGE

SIZE	WEIGHT
144 X 47 CM	65KG +

Size and weight range is indicative only based on normal riding conditions. Actual range will vary based on rider preference, skill level and strength of wind.

**THE INFINITY V1  
IS A DEDICATED  
LIGHTWIND BOARD  
THAT MAKES RIDING  
MORE EXCITING  
AND PROGRESSIVE.  
IT UNIQUELY BLENDS A  
CLASSIC TWIN-TIP FREERIDE  
FEELING WITH IMPRESSIVE  
LIGHT WIND PERFORMANCE.**

Alive with speed and maneuverability, the Infinity redefines what we think of as a light wind board. It is livelier, lighter and smaller than other light wind specific boards on the market - the Infinity motivates progression! It has range too; as the wind increases the Infinity remains smooth and controllable to ride thanks to its unique hybrid freeride-light wind outline.

Designed with a double concave bottom shape going flat towards channeled tips and optimized rocker line. This combination provides early planning, continuous board speed through lulls and impressive upwind performance. The Infinity rides high on the water for comfort in chop and ease of rolling into a turn.

Off centered inserts relieve stress on ankles while edging to ride upwind, this also allows for an easy load and pop in light breezes. The Infinity's cohesive flex pattern provides control when loading up for bigger airs and the progressive flex towards the tips helps absorb landings smoothly.

Ideally suited for twin-tip riders who want simply to cruise, freeriders searching for high end light wind performance, all the way to freestyle addicts aspiring to throw unhooked tricks in a breeze. Don't find yourself sitting in desperation on the beach, take the Infinity and tear it up!

# INFINITY V1 FEATURES

## EXCEPTIONAL OZONE FACTORY CONSTRUCTION

World-class construction in our own factory, using the highest quality materials and hand checked Quality Control at every step. The Ozone factory also manufactures our Kites, Paragliders and Speed Wings; the same Quality Control processes are used across all products.

## DOUBLE CONCAVE & TIP CHANNELS

Designed with a double concave bottom shape going flat towards channeled tips and optimized rocker line. This combination provides early planning, continuous board speed through lulls and impressive upwind performance.

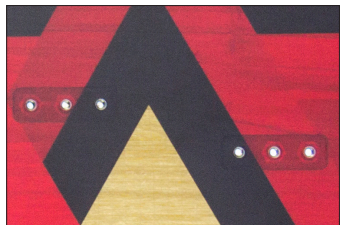

## OFF CENTERED INSERTS

Off centered inserts relieve stress on ankles when edging to ride upwind, this also allows for an easy load and pop in light breezes.

## HIGHEST QUALITY FIBERGLASS

Precise lamination using high quality Biaxial and UD fiberglass layers to provide the ultimate balance of flex, response and strength.

## A-GRADE 316 STAINLESS STEEL INSERTS

Highest quality 316 Stainless Steel inserts embedded into high strength polymer blocks. This insert construction offers superior strength for powered riding and using boots.

## HYBRID FREERIDE-LIGHT WIND OUTLINE

Alive with speed and manoeuvrability, the Infinity V1 redefines what we think of as a light wind board, it's not dull and oversized like some others on the market - the Infinity motivates progression! It has range too; as the wind increases the Infinity remains smooth to ride thanks to its unique hybrid freeride-light wind outline.

## COHESIVE FLEX PATTERNS

The Infinity's cohesive flex pattern provides control when loading up for bigger airs and the progressive flex towards the tips helps absorb landings smoothly.

## A-GRADE PAULOWNIA CORE

The premium A-grade Paulownia core provides ultimate flex characteristics, amazing strength, and reduced weight.

## GRAB RECESS

Grab Recesses on both rails if riding without a handle.
